A) For Interpretation Applications:

Description of Reason for the Requested Interpretation: (Attach additional pages as necessary)

Replace 6 foot fence along property line. Existing fence is rotting wood beyond repair.

B) For Area Variance Applications:

Provide a description of the proposed activity with regard to the following standards. (Attach additional pages as necessary)

- 1) Whether an undesirable change will be produced in the character of the neighborhood, or a detriment to nearby properties will be created by the granting of the area variance;

no undesirable change would be made. In fact, a new fence would look nicer for our neighbors as well

- 2) Whether the benefit sought by the applicant can be achieved by some method, feasible for the applicant to pursue, other than an area variance;

The benefit of replacing an existing fence cannot be achieved without a variance

- 3) Whether the requested area variance is substantial;

The area requiring the variance is not substantial.

- 4) Whether the proposed variance will have an adverse effect or impact on the physical or environment conditions in the neighborhood or district.

No adverse effect or impact on the neighborhood.

A new fence would only enhance the conditions of our yard and the adjacent properties.

5) Whether the alleged difficulty was self-created, which consideration shall be relevant to the decision of the Board of Appeals, but shall not necessarily preclude the granting of the area variance.

This was not self-created. The existing 6 foot fence was there when we purchased the home. The fence is rotting and falling apart. We only wish to replace it w/a new fence.

The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system of equations (1) as $t \rightarrow \infty$. It is shown that the solutions of this system tend to zero as $t \rightarrow \infty$ if and only if the matrix A is stable.

In the second part of the paper, the problem of the asymptotic stability of the solutions of the system (1) is considered. It is shown that the system (1) is asymptotically stable if and only if the matrix A is stable and the matrix B is nonsingular.
